

## 2176 - Lattice Point

#### Asia - Taipei - 2000/2001

A lattice point is a point (x, y) in the 2-dimensional xy-plane with  $x, y \in Z$ , where Z be the set of integers. Let

$$P(r) = \{(x, y) | x^2 + y^2 \le r^2, (x, y) \text{ is a lattice point in the } xy\text{-plane}\}$$

and we denote D(r) be the number of elements in P(r). For each lattice point (x, y) in the xy-plane, let

$$S(x, y) = \{(u, v) | x \le u \le x + 1, y \le v \le y + 1\}$$

and

$$B(r) = \{(x, y) | x^2 + y^2 \le r^2, x \text{ and } y \text{ are real numbers} \}$$

Then it is easy to verify that when  $r > \sqrt{2}$ 

$$B(r-\frac{\sqrt{2}}{2}) \subset \bigcup_{(x,y)\in P(r)} S(x,y) \subset B(r+\frac{\sqrt{2}}{2})$$

We know that

$$\bigcup_{Area(\ (x,y)\in P(r)} S(x,y)) = \sum_{(x,y)\in P(r)} Area(S(x,y)) = \sum_{(x,y)\in P(r)} 1 = D(r).$$

Hence

$$\pi (r - \sqrt{2})^2 < D(r) < \pi (r + \sqrt{2})^2$$

This implies

$$\pi$$
  $\frac{\sqrt{2}}{r}$   $\frac{D(r)}{r^2}$   $\frac{1}{r}$   $\frac{\sqrt{2}}{r}$   $\frac{1}{r}$ 

It yields

$$\lim_{r \to \infty} \frac{D(r)}{r^2} = \pi$$

So if we can calculate D(r) for a large r, then we can estimate the value of  $\pi$ .

The following C function can be used to calculate the value of D(r) withing a reasonable aumount of time when r is a small integer, say e.g.,  $1 \le r \le 10,000$ .

```
long D(long r)
{    long x,y,count=0;
    for(x=-r;x<=r;x++)
        for(y=-r;y<=r;y++)
        if(x*x+y*y<=r*r)
        count++;
    return count;
}</pre>
```

Is is easy to obtained D(1) = 5, D(2) = 13, D(3) = 29, and D(10000) = 314159053 using this program. Recall that  $\pi = 3.14159...$  Your task is to find D(r) for a large r within a reasonable aumount of time.

### Input

There are five lanes in the input file, the *k*th line contain an integer  $n_k (1 \le n_k \le 100, 000, 000)$ .

## **Output**

List integer  $n_k$  in line 2k - 1 and the value of  $D(n_k)$  in line 2k for k = 1, 2, 3, 4, 5.

## **Sample Input**

```
1
2
3
10000
100000000
```

# **Sample Output**

```
1
5
2
13
3
29
10000
314159053
100000000
31415926535867961
```
